

pigPRO™

PIG PASSAGE INDICATOR

pigPRO™

Series 67

The series 67 pigPRO™ is a visual flag indicator with manual reset and isolation ball valve. It detects pig location, offers safety and service options, and allows easy removal for inspection or maintenance using the extraction kit.

Features:

- Detects precise pig location in the pipeline
- Easy removal and re-installation with Extraction Kit
- No specialized hot tap professionals or equipment needed

Available Options:

- Electrical indication, Auto Reset
- Extension Pole
- Flange Mount

Extraction Kit

The extraction kit contains a pressure relief tool and a custom-built extraction

cap and jack tube specifically designed for the Series 67 pigPRO™. Other items include O-Rings, fasteners, lubricant and hex key wrenches. All of this is provided in a protective industrial case.

pigPRO™

Series 67 Flanged

The series 67 pigPRO™ Flanged unit is a visual flag indicator with manual reset and a flanged isolation ball valve. It detects pig passage and allows safe isolation for inspection, maintenance or repair using the extraction kit.

Features:

- Detects precise pig location in the pipeline
- Easy removal and re-installation with Extraction Kit
- No specialized hot tap professionals or equipment needed
